

Presentation title: Resilience enhancement and water demand management for climate change adaptation (Water2Adapt)

Speaker: Dr. Jaroslav Mysiak

Objectives

Objectives

Team

Case studies

Outputs

Events

Further
information

- Examine recent drought events in the context of human-made water scarcity in four selected river basins in Italy, Germany, Spain, and Portugal;
- Identify practices, which lead to unsustainable consumption and inefficient allocation of water;
- Assess the social and economic impacts of droughts; and
- Analyse the performance and wider impacts of water demand management policies.
